## Description

This High Security Pull Box enclosure mounts securely to walls and was designed to protect classified cabling within the Holocom PDS system as an access point, or as a traditional pull box in non-Holocom systems. Additionally, there are vertical mounting rails welded to the back of the enclosure. They can be used with the included set of 4U equipment brackets to mount equipment vertically. The door securely locks using a 3-point lock system and Holocom's patented door back flange, as well as the Sargent and Greenleaf® padlock.
