HOLOCOM[®] ANNOUNCES SMALLER FOOTPRINT PRODUCTS FOR ITS PROTECTIVE DISTRIBUTION SYSTEM

(SAN DIEGO– February 11, 2009) Holocom, the leading provider of proprietary, high-security protective distribution systems (PDS) for SIPRNet and other classified networks, today announced its newest product—Secure Mini Dukt™. Secure Mini Dukt™ is a reduced profile cable carrier designed to integrate with Holocom Secure Raceway. Holocom made the announcement at the Armed Forces Communications and Electronics Association (AFCEA) WEST 2009 Conference.

Secure Mini Dukt™ is constructed of powder-coated, galvanized steel and provides a smaller footprint on the wall without compromising security or user functionality. Like all Holocom products, Secure Mini Dukt™ was designed from an installer's perspective resulting in fewer parts; reduced labor; faster, more efficient product installation; and decreased material and shipping cost.

“As SIPRNet use expands, Holocom continually looks for ways to reduce the costs associated with its implementation,” said John Burns, president & CEO of Holocom. We designed Secure Mini Dukt™ based on customer requests to have a smaller raceway to the end-user drop box. Our engineering staff produced that application, plus additional installation scenarios. The result is even greater savings for the customer.”

Holocom will begin receiving customer orders March 1, 2009 with anticipated customer shipping mid-April 2009.
