## **HOLOCOM<sup>®</sup> ANNOUNCES STOCKING DISTRIBUTOR AGREEMENT**

**(SAN DIEGO – May 29, 2012)** Holocom, the leader in protective distribution systems (PDS) for SIPRNet and other government classified networks, announced a new distributor agreement with Accu-Tech<sup>®</sup> Corporation, a national distributor of active and passive networking components supporting voice, data, security, video, and other applications. With this agreement, Accu-Tech becomes Holocom's third major stocking distributor for its security products to the department of defense and other federal government agencies.

According to John Burns, Holocom CEO, "We were impressed by Accu-Tech's nationwide coverage with 35 strategically located stocking facilities and by their energetic management team. As the government's focus on cyber security continues to increase, Holocom must be prepared to provide critical products quickly and efficiently. Accu-Tech is well-suited to help us accomplish that."

"We are excited to partner with Holocom," added Brad Allen, Accu-Tech's director of government sales. "With Accu-Tech's expertise and experience in federal procurement regulations, cycles, and contracting, we are poised to help Holocom build on its success in meeting the government's strict security requirements."

This partnership is the latest in a series of expansion strategies for Holocom including relocation of its Logistics Center and expansion of the company headquarters to a 10,000 square foot facility in San Diego approximately one year ago. Holocom also entered into a partnership with Fiber SenSys of Hillsboro OR, an Optex Group Company, earlier this year to offer the most cost-effective alarmed PDS solution by combining Fiber SenSys' proven and certified fiber-optic technology in combination with Holocom's industry standard PDS.
